Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The election filed February 5, 2007 has been entered and made of record as paper no. 0207.

Applicant's election of claims 2-10 and 23 in the reply filed on February 5, 2007 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

The disclosure is objected to because of the following informalities:

Page 3 of the specification refers to "claim 1" in a few paragraphs. However, claim 1 was cancelled by the amendment filed 10/12/2006.

Appropriate correction is required.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 2-10 and 23 are rejected under 35 U.S.C. 102(b) as being anticipated by Choi et al (US 2002/0001905 A1, cited by Applicants).

Choi discloses a vertical nano-transistor comprising a source (50), a drain (40), a channel region (100), and a gate region (20) comprising a metal film in which the gate region and the channel region form a coaxial structure.

Claims 2-10 and 23 are alternatively rejected under 35 U.S.C. 102(b) as being anticipated by Yu (US 6,426,259 B1).

Yu discloses a vertical nano-transistor comprising a source (218), a drain (228), a channel region (230), and a gate region (210) comprising a metal film in which the gate region and the channel region form a coaxial structure.

Claims 2-10 and 23 are alternatively rejected under 35 U.S.C. 102(b) as being anticipated by Fitch et al (US 5,612,563).

Fitch et al discloses a vertical nano-transistor comprising a source (14), a drain (34), a channel region (30), and a gate region (18) comprising a metal film in which the gate region and the channel region form a coaxial structure.

The other reference is cited to show other structure pertinent to Applicants' disclosure.
